

## **Intel® Management Engine Firmware 9.x Update Instructions for Intel® Desktop Board DQ87PG and DB85FL**

This utility updates the Intel® Management Engine firmware on the Intel® Desktop Board DQ87PG and DB85FL to version 9.1.41.3024.

### **How to Install:**

1. Download and unzip **PG-FW-Update.zip** from Download Center.
2. Open an Administrator Command prompt window and navigate to one of the following folders, depending on your operating system (OS):
  - **\PG-FW-Update-32bit** – for 32-bit versions of the OS
  - **\PG-FW-Update-64bit** – for 64-bit versions of the OS
3. At the command prompt, enter **FWUPDATE.BAT** to start the firmware update process.
4. Reboot the computer when the update is complete.
