

Intel® Easy Streaming Wizard (Ver. 3.0.0430) – Release Notes

Intel® Easy Streaming Wizard is a free software application that gets you streaming and recording in minutes by leveraging Open Broadcaster Software (OBS).

- Set up a PC for streaming in minutes.
- Authenticate into one of the supported streaming services, then automatically configure and tune the broadcasting software within the wizard.
- Optimize efficiency of the Intel® Core™ Processor for encoding, sound, bandwidth, and other features to determine the best streaming quality possible.

This version supports Open Broadcaster Software (OBS) version 25.

New Features in this Release

The Intel® Easy Streaming Wizard V3.0.0430 has been updated to include functional and security updates. Users should update to the latest version.

New and Updated Features:

1. UI Redesign / New Color Scheme
2. Easily retune specific components after initial setup
3. Added support for Mixer and Facebook streaming services
4. Authenticate into streaming service with login or stream key
5. Integrated chat / activity feed for supported processors and streaming services
6. Updated OBS version supported to v25
