Note:

1. If you are uncertain of which Intel processor is in your computer, Intel recommends using the [Intel Processor Identification Utility](https://www.intel.com/content/www/us/en/processors/core/core-processor-family.html) or Install the [Intel Driver & Support Assistant](https://www.intel.com/content/www/us/en/processors/xeon/xeon-processor-e3-family.html) (previously called Intel Driver Update Utility) to identify your Intel processor.

2. In the Intel Graphics Command Center (System > Driver), the ‘Microsoft DirectX*’ version refers to the operating system’s DirectX version. The DirectX 12 API is supported but some optional features may not be available. Applications using the DirectX 12 API should query for feature support before using specific hardware features. Please note that DirectX12 is only supported on Windows 10 and DirectX11.3 support is also available on supported Microsoft* operating systems.

3. Intel Labs conducts independent testing of supported titles on Intel platforms to ensure playability. Please refer to publisher system requirements to ensure compatibility with your system.
