

INTEL[®] NUC M15 LAPTOP KIT – DRIVER INSTALLATION GUIDE

OCTOBER 2020

Driver Installation

After installing Windows 10, install the drivers in the order below.

1. **Chipset:** double-click, **SetupChipset.exe**.
2. **ME:** double-click, **SetupME.exe**.
3. **Graphics:** double-click, **igxpın.exe**. Restart.
4. **Serial IO:** double-click, **SetupSerialIO.exe**.
5. **Audio:** navigate to the *Audio_InstallPackage_1.2* folder.
 - a. Right-click, **VC_redist.x64.exe** and select, *Run as administrator*.
 - b. Right-click, **InstallPackage.bat** and select, *Run as administrator*.

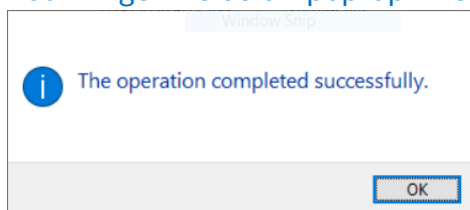

Note: It may take over a minute for the installation to finish. After installation the system will automatically restart.

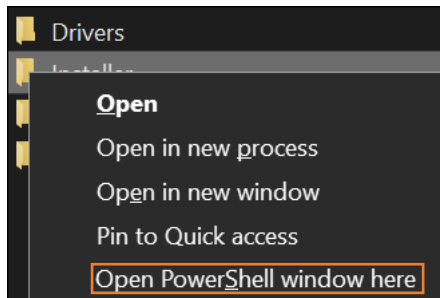

6. **HID Event Filter:** double-click, **Setup.exe**. Restart.
7. **Integrated Sensor Hub:** double-click, **SetupISS.exe**.
8. **Dynamic Tuning:** double-click, **Dtt_8.7.10401.16510_Install**.
9. **Intel Context Service (ICSS):** double-click, **ICSS_8.7.10401.16510_Install**.
10. **THC Base Driver:** Navigate to the *Driver_MSI* folder, right-click on, **IntelTHCBase.inf** and select **Install**.

You will get the below pop-up when the installation is complete.

11. **Wi-Fi:** Navigate to the *UWD* folder. While holding the SHIFT key, right-click the *Installer* folder and select, *Open PowerShell window here* (CMD window will also work).

In the window that opens, type: **WirelessSetup.exe -fcode** (Windows will automatically add the: .\.)and hit the enter key. Follow the prompts.

12. **Bluetooth:** double-click, **Intel Bluetooth.msi**.

13. **Camera:** there are 5 .inf files to install. Select all of them at once, right-click and select *Install*. You will get the same pop-up window as in step 9, except this time you will get 5 of them.

14. **GNA:** right-click on, **gna.inf** and select *Install*. You will get the same pop-up window as in step 9.

15. **Thunderbolt™:**

- Open *Windows PowerShell (Admin)*.
- Change the directory to the thunderbolt folder.
- To install the drivers and Control panel, type: **.\Setup.bat appInstall**
- If you get an error, you can use the **Thunderbolt(TM) Software Installer.exe** to install thunderbolt.

16. **Touchpad:** right-click, **Install.bat** and select, *Run as administrator*.

17. **KB LED Service:** double-click, **Intel_KB_LED_SERVICE_1.0.0.2.exe**.
