

# IMAGE RETENTION REMOVAL TOOL

## OCTOBER 2022

Use this tool to remove image retention on the Intel® NUC Laptop Kit. The tool will need to be left running in full screen mode for at least 24 hours.

Note: A longer duration may be required in some cases.

1. Unzip the "Image Retention Removal Tool-User Guide-v1.0.zip" on the Intel® NUC Laptop Kit.
2. Double Click "Test\_Pattern.exe" to start the tool.
3. The tool will start in full screen mode.
4. Press "ESC" to exit full screen mode.
5. Select "Auto" from the menu.
6. Select "Run" from the drop-down list.

7. Select "File" from the menu.
8. Select "Full Screen" from the drop-down list.
9. After at least 24 hours press "ESC" to exit full screen mode.
10. Select "Auto" from the menu.
11. Select "Stop" from the drop-down list.
12. Close the window.
