Notes

- For the new Intel® Wi-Fi 7 products - Intel® Wi-Fi 7 BE202 and Intel® Wi-Fi 7 BE200
 - All Intel® Wi-Fi 7 products support the 6GHz band for Wi-Fi. Usage of the 6GHz band relies on Microsoft Windows (Windows 11*) **Operating System** support. The products have limited functionality on Windows® 10.
 - The Wi-Fi 7 features are not currently available because of pending OS (Windows 11*) support. As a result, after installing the drivers, the Intel® Wi-Fi 7 products function with Wi-Fi 6E capabilities on Windows 11*.
- The Intel's Wi-Fi 7 product "Intel® Wi-Fi 7 BE200" will support Wi-Fi 6E + 320 MHz/4K QAM (known as EHT - Extremely High Throughput) by default when connecting to a Wi-Fi 7 wireless router/AP.
